
Help us inform donors and the general public of the importance of supporting research!

In order to raise awareness among the general public of the importance of funding cancer research, the Cancer Research Society (CRS) is aiming to distribute more information on the research projects, breakthroughs and advancements it funds. By presenting researchers and their teams, as well as its various research projects to the public, the CRS will position itself to improve communications with donors and partners in order to strengthen its relationships with them.

To achieve this goal, **the Cancer Research Society needs your help!**

Please take a few minutes to fill out this progress report. Your answers will not only keep us informed as to the status of your research project but they will also help us to better inform the public about your research activities and on how their money is spent!

Thank you in advance for your invaluable cooperation.

Mario Chevette
President of the Board of Directors
Cancer Research Society

Filling out the progress report couldn't be easier!

Please fill out the report electronically, by visiting our website at www.CancerResearchSociety.ca (click the FOR RESEARCHERS tab and select ARE YOU A RESEARCHER? from the menu). Once the report is completed, you can:

- 1) Click on the **"Save as"** button at the end of the document in order to attach it to an email. Please send it to us at the following address: grants@src-crs.ca
- 2) Click on the **"Print"** button at the end of the document in order to send it to us:

By mail:
Cancer Research Society
Scientific Department
625 President Kennedy Avenue
Suite 402
Montreal, QC H3A 3S5

By fax: 514 861-9220

General information:

Date		
Principal investigator's name		
Co-applicant(s)'s name		
Institution name		
Title of the funded research project		
Funding period		
Initial funding or renewal	Initial funding	Renewal

Question 1:

Please detail your research progress, as compared to the initial objectives and timeline of your grant (maximum of 15 lines).

Question 2:

Please detail the progress of your research project in non-technical terms, to be understood by those that are not in biomedical research (maximum of 15 lines).

Question 3:

What are your most satisfying achievements regarding the progress of your CRS grant and describe their scientific impact (maximum of three, in point form)?

Question 4:

Please list all your CRS supported scientific publications and communications (include full list of author names, title of article, name of the journal and year of publication).

Question 5:

Please conclude and detail your future work (maximum of 20 lines).

NOTE: Please inform the CRS if a press release is published by your institution regarding your CRS funded work.

Thank you for your cooperation!
